

# The **BOXMAKER**

*Entry level, short run boxmaking machine*

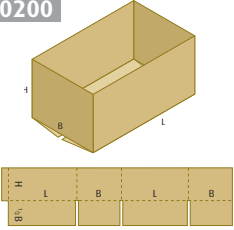

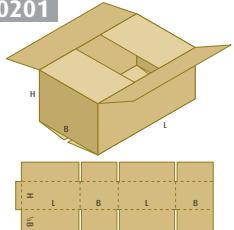

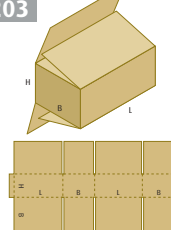

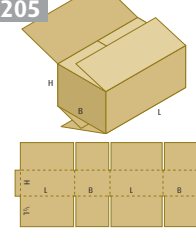

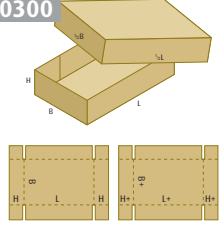

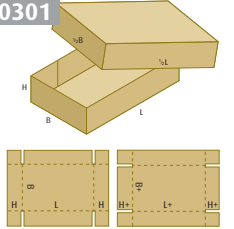

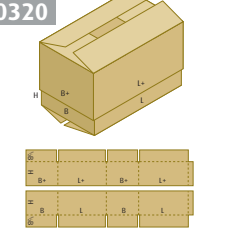

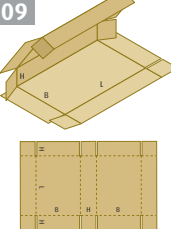

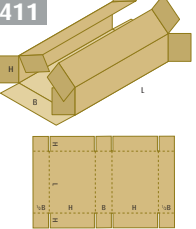

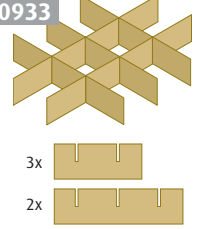

- Answers the growing demand for short runs of corrugated boxes – flexibility and versatility
- Manufacture your exact packaging requirements when you need them, 'Just-In-Time'
- Gain substantial savings on storage
- Rapid change-over between box sizes & styles
- Quick and easy to use
- Over 50 FEFCO box styles available
- Minimal training required
- A major step forward in short-run corrugated box manufacturing

The "Generation 7" **BOXMAKER** combines ease of use with flexibility of operation, allowing 'Just-In-Time' production of exact size corrugated boxes in-house. With a machine set-up time of a few seconds, boxes of virtually any size, large or small, can be made quickly and easily. Simply choose your box style, input the required dimensions and the machine is ready to produce one box or hundreds.

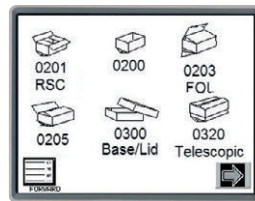

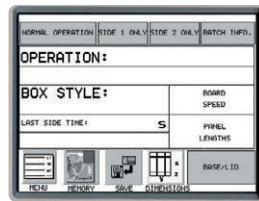

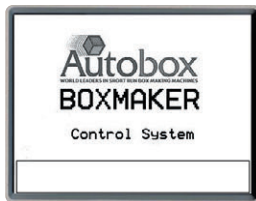

By producing boxes in-house companies can immediately benefit from large financial savings by reducing box inventory, storage space and on the cost of the boxes themselves. The right size box every time, at a moments notice!

The onboard PC and touch-screen with simple, easy to use menu-driven electronics, has a memory facility for storing often used box data and dimensions, making batch orders much quicker and easier.

The **BOXMAKER** is built to exacting standards. The simple operation requires only a few seconds to set up & only minimal training is required for a new user to become fully proficient.
