

SLITTER SCORER

Easy to use corrugated sheet slitting machine

AutoBox SS

- Quick and easy to use
- Solid box chassis construction
- Easy slip surfaces
- Quick set scoring
- Single phase power
- Variable speed motor with electric control

The **SLITTER SCORER** combines ease of use with versatility to provide exact cut sheets of board ready for boxmaking. The back guide is positioned using an accurate winding mechanism, whilst a digital counter gives a clear read-out of the measurement.

Operating from a single phase supply, the **SLITTER SCORER** has a variable speed motor with electric control to combine precise sheet slitting with an easy operation.

Scoring tools are available for more complex boxmaking, or for the production of simple wraps and edge protection.

For over two decades, Kolbus AutoBox Boxmakers have provided companies in all types of industry, with the facility to produce tailor made corrugated cases on a 'just-in-time' basis.

Maximum cut	1600mm from any edge
Minimum cut	25mm from any edge
Scoring	2 quick set scoring tools
Speed	Variable speed, electronic control
Materials	All single-wall corrugated and up to 400/400/400 AA double wall
Power requirements	220-240V 50-60Hz single phase
Back guide	Position indicated by Digital Counter (metric or inches)
Overall dimensions	3170mm length x 2000mm width x 1270mm height approx
Shipping weight Net	570Kgs
Shipping weight Gross	660Kgs
